SKILLS

Language: Cantonese, Mandarin, English
Techniques: Blender, JavaScript, C#, node.js, npm, Matterport 3D scan, Photoshop

EDUCATION

Centennial College
FALL 2022 –

University of Manchester
2011-2014
BSC (HONS) Management (Marketing)

COLLEGE ACTIVTIES

Volunteer of basic Python workshop
7th Dec 2022
I participated in a volunteer project last semester, organized by Professor Narendra Pershad and Professor Mehrdad Tirandazian, where I assisted and guided junior students in learning Python.

Fluent English speaking and basic knowledge of Linux
As per Professor Vivek Ahuja's requirement, some of my coursework includes video recordings that demonstrate the process of setting up a web server and configuring the connection settings between two machines.

Comfortable switching between OS
Since I usually use a macbook, I sometimes need to switch to Windows for college, particularly for C# exams that require the use of WinForms. However, I am also proficient in using Fedora and Ubuntu and have installed Node.js and NPM. Additionally, I am self-learning Angular with the help of Professor Eduardo Santana Severino's materials.

A good sense of art

My portraits show a good sense of art and can help improve frontend development work by creating visually appealing interfaces with balanced designs and layouts.
